

CIA After Him, Sukarno Says

Jakarta, Sept. 6 (Reuters) — President Sukarno said today he was a Marxist and accused the American Central Intelligence Agency of plotting to destroy him.

"In some places now there are snipers to kill Sukarno," he declared in a speech here. He said he had proof.

Addressing members of The 1945 Generation, who included many of his old associates in the days before independence, he said he had received a letter from British philosopher Earl (Bertrand) Russell warning him to be more vigilant and stating that the CIA had expanded its budget five times to intensify its activities.

Sukarno's acknowledgement of his marxist beliefs came earlier today when he spoke at his Jakarta palace.
